

Final Report of Sales Financial Analysis

This project presents a **sales financial dataset analysis** built entirely in **Power BI**. The goal is to transform raw transactional data into clear, actionable insights for business decision-making. By tracking **KPIs**, identifying **top customers**, comparing **territory profit margins**, and analyzing **product growth trends**, the dashboard highlights both strengths and risks in performance.

Key Questions Answered

- **KPIs:** Total revenue, total profit, and profit margin.
- **Top Customers:** Who are the top 10 customers by revenue?
- **Territory Margins:** How efficient are different regions?
- **Product Growth:** Which product lines are growing or declining?
- **Correlation:** Relationship between revenue and profit.

Key Insights

- **Overall Profitability:** Revenue of 13.97K with a healthy 30% profit margin.
- **Top Customers:** Tyrell Corp contributed 15.95% of total revenue.
- **Territory Efficiency:** Asia, North America, and Europe all achieved consistent 30% margins.
- **Product Growth Trend:** Electronics grew +60% between Jan–Aug 2023, while Furniture declined -28.33%.
- **Correlation Analysis:** Strong link between revenue and profit, with Electronics leading in both.

Takeaway: Electronics is the top-performing product line, driving both revenue and profitability, while consistent margins across territories show operational efficiency.
